ЦВЕТА RAL

RAL - международная система соответствия цветов, востребованная сегодня практически во всех отраслях. Стандарт занял доминирующее положение в промышленности, торговле, архитектуре и дизайне. Ведущие российские и западные компании используют цвета по RAL в своем производстве.

Цветовой стандарт RAL начинает свою историю с 1927 года, когда специалистами из «Управления по торговым стандартам» Германии была впервые разработана коллекция, состоящая на тот момент из 40 цветов. С тех пор палитра RAL постоянно расширяется. Компания выпускает каталоги цветов, веера, содержащие примеры красок по RAL, разрабатывает и добавляет новые образцы.

КАТАЛОГ ЦВЕТОВ RAL DESIGN

В 1993 году введена палитра цветов, разработанная с учетом потребностей архитекторов, дизайнеров и рекламодателей. Каталог RAL DESIGN содержит 1625 цветов (изначально состоял из 1688 цветов, но затем был сокращен).

Новую палитру нельзя считать продолжением классической, нумерация цветов и принципы формирования совершенно иные. Цвета в таблице RAL DESIGN систематически упорядочены по системе CIE Lab. Имя цвета представляет собой семизначный код, разделенный на три группы - ННН LL CC, где Н - оттенок, L - яркость и С - насыщенность.

Образец	Цвет RAL	CMYK (C)	CMYK (U)	HTML	RGB
